

Army Information Update

Because information is power, we are informing you each personally and inspiring you to pass it along.

BACKGROUND: Department of the Army (DA) understands access to relevant, timely and accurate information plays an important role in the quality of life for our Soldiers and their Families.

GOAL: Soldiers and Families can quickly orient themselves to a new installation and its surrounding community with an “at their fingertips” customizable tool.

SPECIFICS: The Army Software Factory, in coordination with Installation Management Command (IMCOM) is spearheading the creation of a proof-of-concept App called “My Army Post,”. They are developing this app with direct input from Soldiers and Families to ensure the final product has the capabilities and flexibility to be an effective tool for Soldiers and Families to quickly and easily find relevant, timely, and accurate information about their specific installation and community. Soldiers and families will be able to tailor their home screen based upon where they live and what services they use. The app will allow real-time access to: Gates, Finances, Housing, Schools, Jobs, Fitness, Food, Soldier and Family Support, Medical, and Safety.

A SNEAK PEAK: Check out the My Army Post Youtube demonstration here:
<https://youtu.be/HpAS4R9B8mc?si=TQt0OPEQkTV8TmnG>.

WHERE ARE WE COLLECTING FEEDBACK? Currently: Fort Cavazos- 100 Soldiers and 5 Command Teams. Beginning January 2024, five more installations will be added: USAG Bavaria, Fort Moore, Fort McCoy, Camp Humphreys & Fort Meade

THE WAY AHEAD: Once Army Software Factory has determined exactly what the application must be able to do, they will send it out for competition in early 2024.

WE NEED YOUR HELP! Tell us what a great Army Installation app should do!
